SYLLABUS

AI Product Manager

Learn how to evaluate the business value of an AI product. Build fluency with AI concepts, create a data set, measure the effectiveness of different Machine Learning models, and craft a product proposal.

[Related Nanodegrees](#)

— [HIDE DETAILS](#)

PREREQUISITE KNOWLEDGE

No prior experience is required. [See detailed requirements.](#)

- **Introduction to AI in Business**

Gain foundational knowledge of AI and machine learning, how to develop a business case for an AI application, and how and when to use AI in a product.

- **Creating a Dataset**

A high-quality training data set is essential for machine learning models. Learn how to create a high-quality dataset, including how well the data fits a particular use case.

CREATE A MEDICAL IMAGE ANNOTATION DATA SET WITH APPEN

- **Building a Model**

Learn how a neural network produces a decision and how “training” works. You’ll also learn how to use training data and how to evaluate the results of a model.

BUILD A MODEL WITH GOOGLE AUTOML

- **Measuring Impact and Updating Models**

Learn how to measure post-deployment impact, and how to make data-informed improvements on your model. You’ll also learn how to avoid unwanted bias, ensure security and compliance, and how to scale your product.

CAPSTONE PROJECT

All Our Programs Include

Real-world projects
from industry experts

With real world projects and immersive content built in partnership with top tier companies, you'll master the tech skills companies want.

Technical mentor support

Our knowledgeable mentors guide your learning and are focused on answering your questions, motivating you and keeping you on track.

Career services

You'll have access to resume support, Github portfolio review and LinkedIn profile optimization to help you advance your career and land a high-paying role.

Flexible learning program

Get a custom learning plan tailored to fit your busy life. Learn at your own pace and reach your personal goals on the schedule that works best for you.
